

Here's what makes Results better

1. You will receive hands-on treatment from a licensed physical therapist at every visit

Unlike most PT organizations, at Results a licensed physical therapist is always part of your care team, providing experience, knowledge and hands-on treatment. This personalized approach ensures your care plan progresses with you, so every visit builds on the last and you get better faster.

2. You will receive treatment from the very best

Every person in a Results clinic is highly trained and dedicated to creating a positive experience and caring environment. In fact, every Results physical therapist receives four times the industry standard of continuing education, with a concentration on advanced manual therapy techniques. That's why Results therapists perform in the top 10% in outcomes measures when compared to the largest national database of physical therapists in the U.S.¹

3. We make it easy

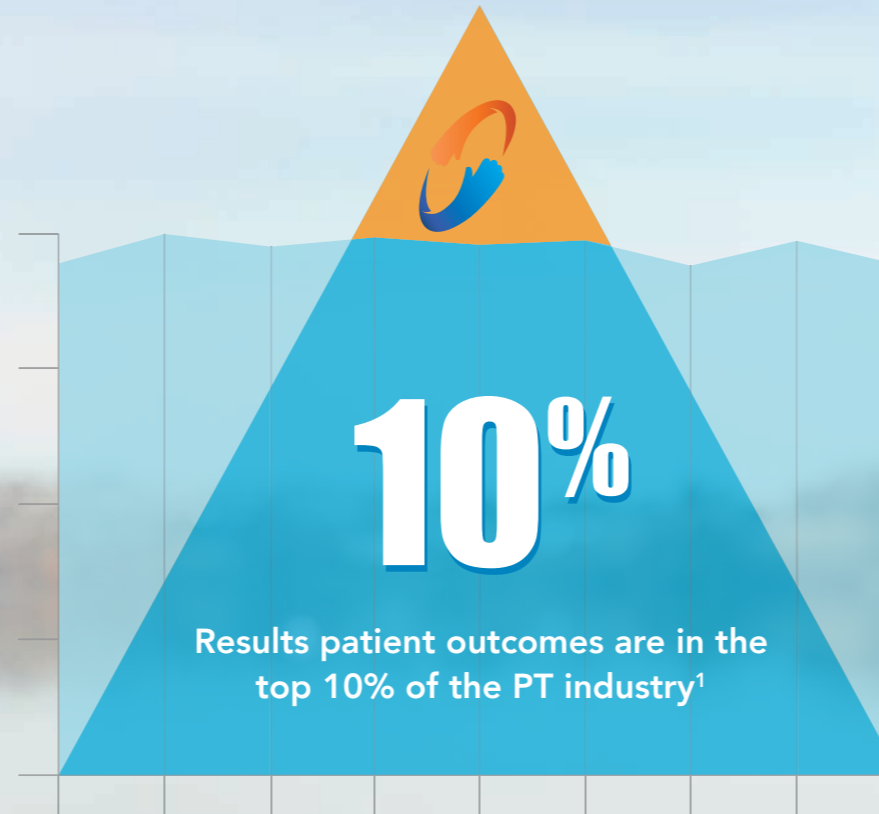

We offer convenient hours (including before and after work), have multiple locations, and accept a majority of insurance plans. We take the hassle away so you can focus on getting better faster.

A Better Approach
to Physical Therapy

We're called Results for a reason

We don't just say we're better: independent data sources confirm that Results Physiotherapy ranks in the top 10% for patient outcomes of all PT organizations nationally. To learn more about how Results helps tens of thousands of patients every year get back to the life they love, visit our website or schedule a free consultation with a therapist.

1 Based on independent data source: Focus on Therapeutic Outcomes, April 2015-March 2016, with PT organizations of 20 clinics or more.

We can get you better, faster

Recognized as one of the highest quality physical therapy organizations in the nation, Results Physiotherapy successfully treats more than 100 musculoskeletal conditions, as well as all common post-surgical rehabilitation. For information about these and other conditions we treat, go to: ResultsPT.com/conditions
